

ALL NEW

P.770

FEATURE	BENEFIT
FORGED HOLLOW BODY CONSTRUCTION	The forged hollow body construction gives golfers the best of both worlds; beauty and performance. A soft 8620 carbon steel body is paired with an incredibly thin forged 4140 steel face and Thru-Slot Speed Pocket™ for a design that is fast, flexible and forgiving even in a compact head shape.
FLTD CG	FLTD CG strategically positions the center of gravity (CG) the lowest in the long irons and progressively shifts higher throughout the set. Using up to 46g of tungsten, FLTD CG is designed to provide players with improved launch and playability in long irons and increase spin in the scoring irons.
SPEEDFOAM AIR	All new SpeedFoam Air is 69% less dense than its predecessor, creating mass savings that is redistributed to improve performance. SpeedFoam Air dampens vibrations for exquisite sound and feel while delivering a fast, flexible face.
TOUR-INSPIRED SHAPING	Featuring elegant refinements, including less offset in the long irons, the new P.770 is designed to fit the eye of a more discerning player with visual cues including a thin topline, less offset, and shorter blade length when compared to the P.790.
THRU-SLOT SPEED POCKET	The Thru-Slot Speed Pocket™ provides increased face flexibility while preserving ball speed and distance on low face strikes.
